

Carbon Reduction Plan

Supplier name: Biogen Idec Ltd

Publication date: August 2025

Commitment to achieving Net Zero

Biogen Idec Ltd. is committed to achieving net zero emissions by 2045.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019	
Additional Details relating to the Baseline Emissions calculations. This is the first year Biogen Idec Ltd (Biogen) is reporting its emissions as a stand-alone UK entity, apart from Biogen global, introducing a new organizational boundary in greenhouse gas (GHG) emissions accounting across Scope 1, 2 and 3 emissions. Historic baseline emissions for Scope 1 and Scope 2 reflect Biogen UK operations only. Scope 3 emissions are reported for the first time in 2024, as prior reporting was not feasible due to data limitations.	
Baseline year emissions: 2019	
EMISSIONS	TOTAL tCO ₂ e
Scope 1	381 tCO ₂ e
Scope 2	0 tCO ₂ e Scope 2 emissions were reported as zero because Biogen purchased renewable energy certificates (RECs), which match its electricity use with renewable generation. Under market-based accounting, this allows Biogen to report zero emissions.
Scope 3 (Included Sources)	2019 baseline year emissions are not available
Total Emissions	381 tCO ₂ e Total emissions include Scope 1 and Scope 2 only

Current Emissions Reporting

Reporting Year: 2024	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0 tCO₂e Scope 1 emissions are reported as zero because the Biogen building is fossil fuel-free, and the company does not own any vehicles.
Scope 2	0 tCO₂e Scope 2 emissions are reported as zero because Biogen purchases RECs, which match its electricity use with renewable generation.
Scope 3 (Included Sources)	3,168 tCO₂e* Category 4 Upstream transportation: 0 Category 5 Waste generated in operations: 0.2 Category 6 Business travel: 1,194 Category 7 Employee commuting: 355 Category 9 Downstream transportation: 138 *Total Scope 3 emissions also include those from purchased goods and services (Category 1), capital goods (Category 2) and end-of-life treatment of sold products (Category 12).
Total Emissions	3,168 tCO₂e

Emissions reduction targets

Biogen Idec Ltd (UK) aims to achieve net zero emissions by 2045, representing a 90% reduction from baseline, with permanent removals of any residual emissions by 2045.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

Scope 3 emissions are the primary contributor to Biogen’s GHG emissions. To address Scope 3 emissions, Biogen has completed a GHG emissions inventory as well as an analysis of suppliers accounting for 90% of the company’s Scope 3 (UK) emissions across categories 1 and 2.

Based on the above analysis, Biogen is planning strategic supplier engagement, focusing on the areas with the greatest potential for impact. Additionally, Biogen has incorporated agreements around environmental sustainability into supplier contracts.

Biogen also is assessing additional potential actions to reduce other key Scope 3 categories, notably Category 6 (business travel) and Category 7 (employee commuting), which account for the bulk of emissions not associated with Biogen suppliers. Biogen already has a number of initiatives underway to encourage lower-emissions modes of transport, including mobilizing the company's ourIMPACT Employee Resource Group to build greater awareness and drive additional behaviour change toward more sustainable options.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
